EXPERIENCE

Intern   Sept 2023-Oct 2023
Bharat Intern   *Virtual Internship Program*

- Achieved growth in my HTML, CSS, JavaScript skills.
- Developed my own portfolio web app, Netflix Static Home Page clone.

PROJECTS

The React Blog is a web app where author can publish a blog even author can delete it and republish it also. I made it with the help of React framework only.

Link Tracker - Chrome extension is a browser extension that keep track of link. User just have to press the single button and next time user can easily enter a particular web page with a single click. This is made with JavaScript

Blackjack is a game built with help of calculative logic and JavaScript as a language. It's a casino game where user bets and get amount according to numbers he/she gets.

Movie Mania Built a movie and web series finder web app where user can search particular movie and it into his/her favourites. To make this I used React framework.

Dr.Chemistry Built a chemistry based fully responsive website. Where user can get brief information by clicking on images and watching videos on website itself and they can by courses, do direct WhatsApp chat with an instructor. Frontend portion is completed and backend is still in production. This whole project is based on Next.Js framework.

EXTRA-CURRICULAR ACTIVITIES

- Actively Participated in management teams of events like "TedxSvit" - a Ted event in my college.
- Actively take a part in different Hackathons across platforms and colleges. Till date I have been participated in five Hackathons and made projects that gave me lots of learning.

LEADERSHIP

- Head for the coding club of my college for 1 year where we arranged one seminar and club's head team started the journey of learning development.
- Joint Head of the one of non-Tech event in college's national level tech symposium. From this event I learnt about managing team and how to make my event successful.
